

KidletCoin on-chain history

Historical source edition | 7 September 2026

Public crypto research edition. The following material preserves historical analysis, source identifiers, transaction amounts and stated qualifications. Observations retain their original dates, principally 5-7 September 2026. Preparing this edition did not repeat the blockchain, corporate-registry or legal research.

Read each assertion with its cited source and limits. A public role, a wallet connection or a valid transaction does not by itself identify a human operator, prove personal receipt or establish wrongdoing. The reports distinguish findings, interpretations and unanswered questions.

Correction precedence: the 7 September 2026 ShibaFriend claims review reports repayment of the principal of all 23 non-dust funding addresses, with only 168 base units of dust unmatched. It also reports equal project matches for all 194 identified paid Mystery Box mints. Those later findings supersede earlier uncertainty about those specific questions. See [Research_Paper_ShibaFriend_Claims_Review.pdf](#).

Original source-page labels and reference identifiers are retained where useful. Gaps in numbering reflect the crypto-only scope. Historical references to companion records are locators; consult the repository inventory to see which records are included. Current availability of an external source is not guaranteed.

Contents and document control

| Consolidated investigator edition | Remaining-question review, 7 September 2026

This consolidated edition presents historical transactions, wallet relationships and mandates; reserve mapping and dated archive evidence. Source identifiers and hyperlinks are retained. Blockchain, registry and archival observations remain tied to the dates and verification limits stated in the report. The full125-address Symbol allocation table accompanies the evidence as a CSV; the report retains its source totals, all28 KID transfers and90 transaction references.

Findings and reading guide

This report presents the 28-transfer KID ledger, 24 returned account histories and later archive findings. Full-ledger and price observations remain 5 September 2026. A bounded 7 September check verifies education-account history and three control thresholds; it is not a full replay. Amounts are KID/XEM unless CAD is specified; times are confirmed UTC. T001-T090 resolve to full hashes; S01-S15 and added prefixes resolve to public sources. Full addresses and dated balances follow the ledger.

The records establish supply allocation, shared signing authority and reciprocal KID/XEM activity. Twelve Foundation SEA receipts into NBDCOH total 221,287.57 XEM (historical CA\$52,553.72), not a proven KID grant. Shared keys and mixed balances do not establish human ownership, commercial customers, financial entitlement or wrongdoing. The 125-target Symbol reserve table is preserved intact in a companion CSV, with the published totals below.

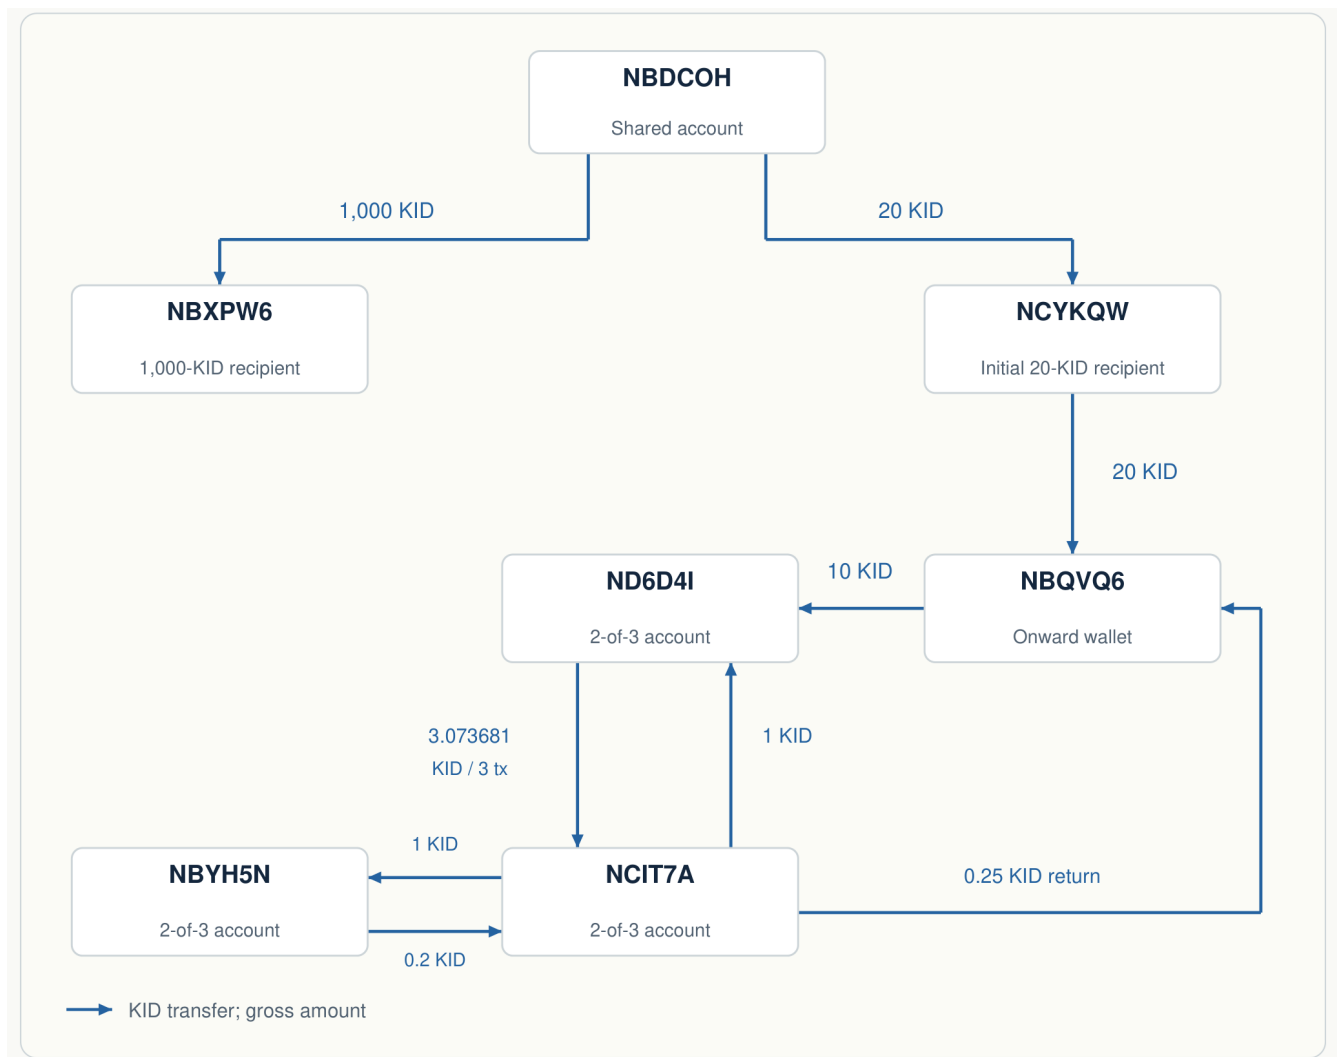

Wallet map 1: KID allocation network

Wallet map 1: KID allocation network

13 wallets; 17 transfers; 16 directed pairs. Arrows aggregate KID by direction; distributor → NBDCOH 700,000 combines two transfers. The next figure repeats NBDCOH as anchor.

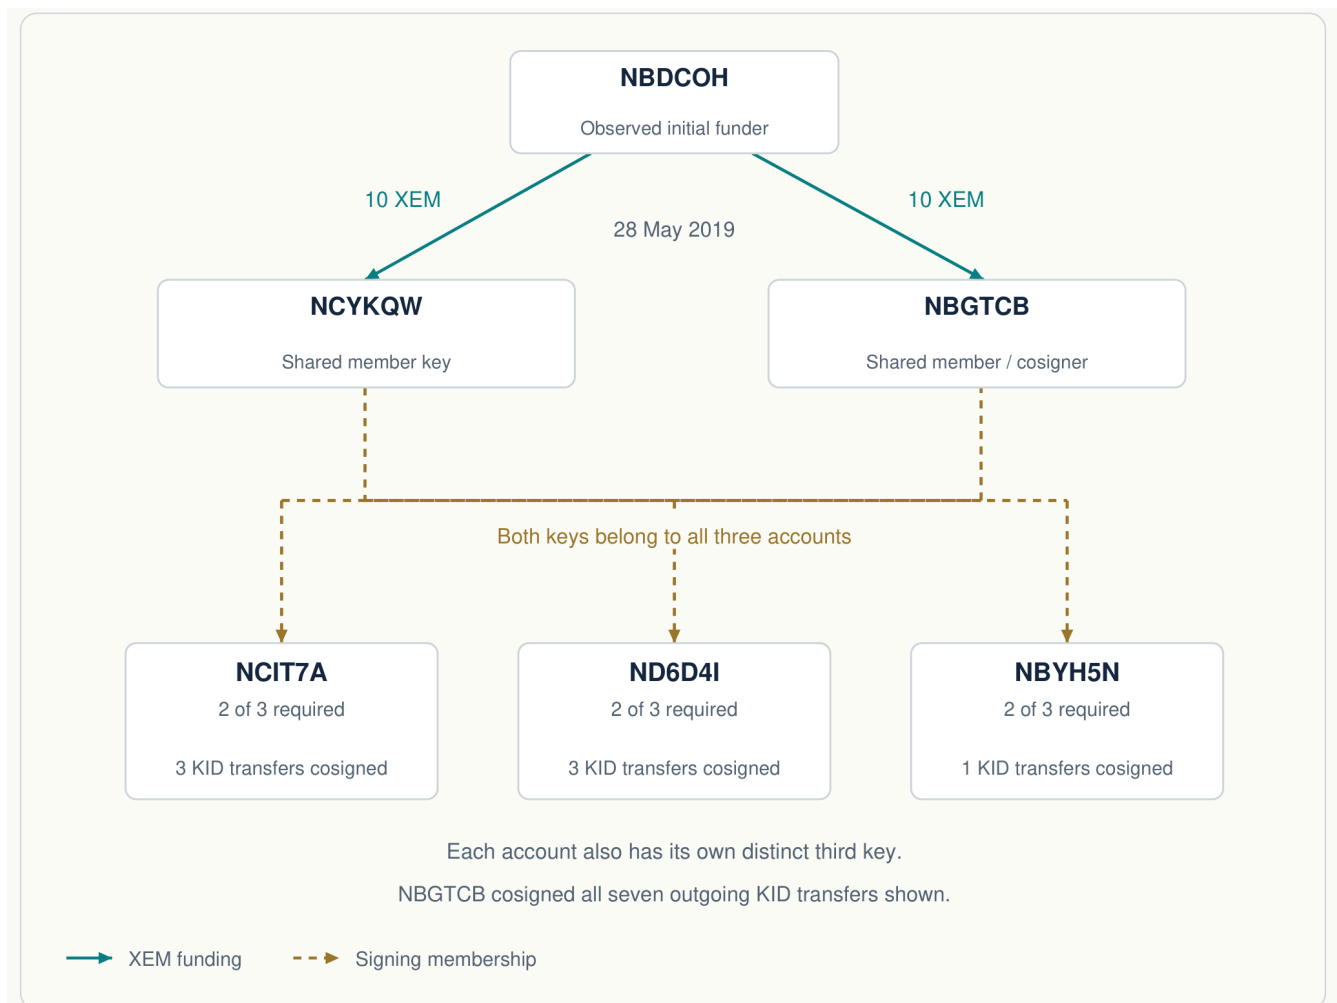

Wallet map 2: KID small-transfer branch

Wallet map 2: KID small-transfer branch

Seven wallets, including NBDCOH; 11 transfers/nine directed pairs. Both KID maps together cover 28 transfers, 25 pairs, 19 distinct participants. The 3.073681-KID arrow aggregates three transactions.

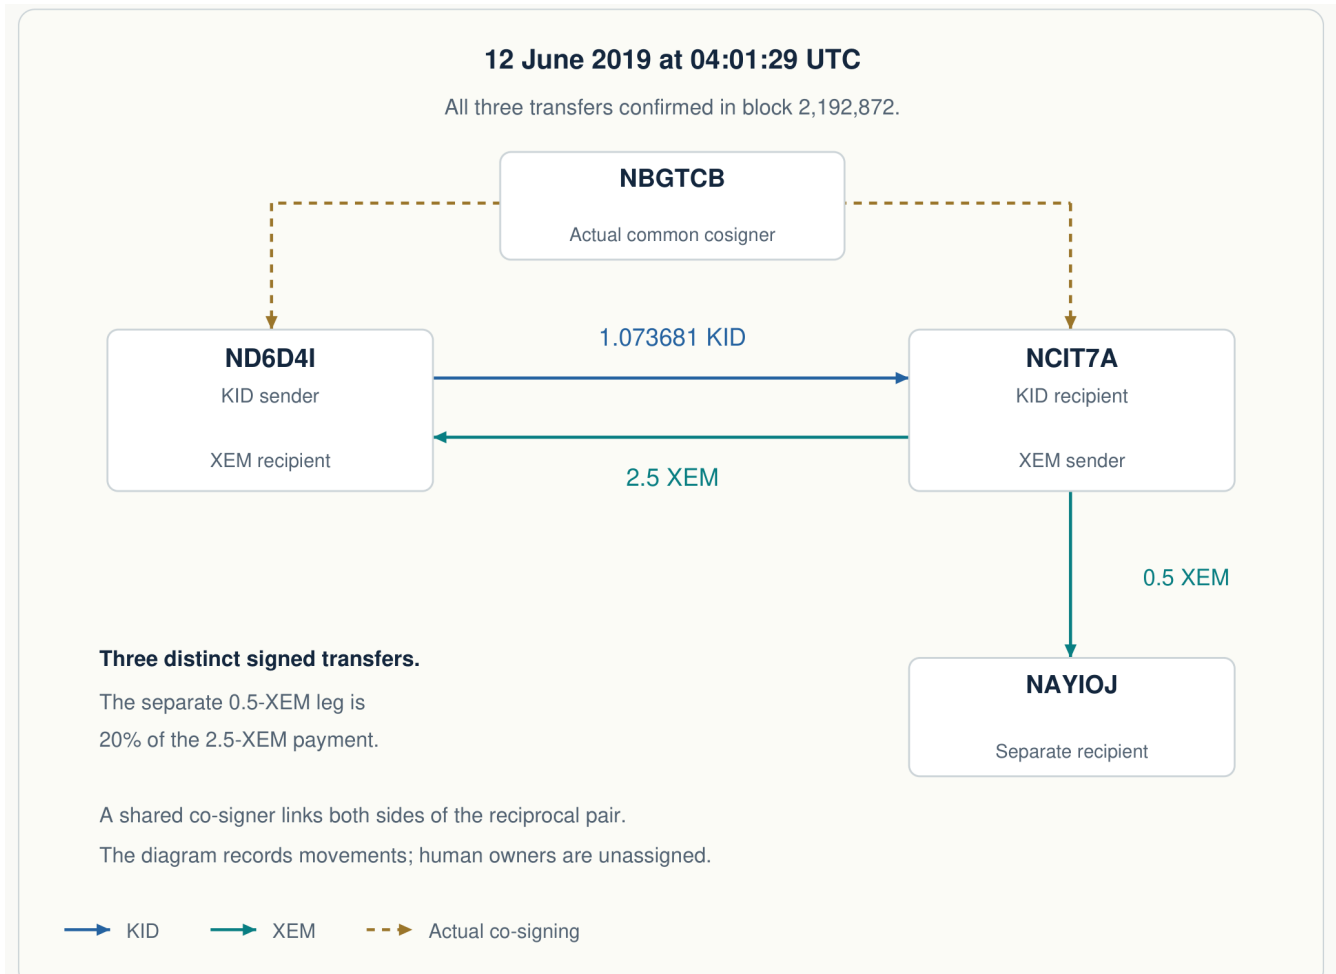

Wallet map 3: Shared funding and signing authority

Wallet map 3: Shared funding and signing authority

NBDCOH funded the two common keys 10 XEM each, 17 seconds apart on 28 May 2019. They shared five 2-of-3 accounts; the three KID participants appear here. Third keys initiated seven outgoing KID transfers and NBGTCB cosigned. Keys do not count people.

Wallet map 4: Reciprocal KID / XEM example

Sixteen baseline histories were fully paginated, then latest pages matched exactly; eight further accounts reached terminal empty pages. Checkpoint height 5,818,411 precedes the last two small additions. The KID index also ended on an empty page. All 28 token hashes, senders, recipients and amounts reconcile; selected funding, reciprocal, parallel-payment and ND2JRP transfers have preserved block evidence.

Histories: <https://nem01.symbol-node.com:7891> . Block objects:

<https://nem02.symbol-node.com:7891/block/at/public> . These endpoints share an operator family.

“Complete” applies to the stated returned histories, not local consensus/signature verification, whole exchange hubs or all unrelated assets/migrations. Raw creation and confirmed timestamps remain distinct.

Token lifecycle and historical positions

Confirmed UTC	Event	Height	Transaction
2018-04-09 05:07:37	Namespace registration / renewal	1580133	T001
2018-04-09 05:35:06	Mosaic definition	1580152	T002
2019-05-04 05:38:06	Namespace registration / renewal	2137262	T003
2019-05-04 05:59:47	Mosaic definition	2137280	T004
2020-04-29 06:33:31	Namespace registration / renewal	2652960	T005

Definition: 21 million KID, six decimals, fixed supply, transferable. May 2019 redefinition changes a newline, not supply. No supply-change transaction was returned. Levy: 10 atomic XEM = 0.00001 XEM to NCEUKZ, not 10 XEM or a percentage.

The 2019 renewal came 31,529 blocks after first expiry, inside 43,200-block grace. Last renewal 29 April 2020 gives final expiry 3,178,560 (2 May 2021, 07:44:17 UTC) and grace boundary 3,221,760. No later renewal was returned; surviving explorer numbers do not establish spendability/redemption.

Supply moved issuer → staging → distributor on 9 December 2018: the same 21 million twice. May 2019 allocations include 8.4 million development/6.3 million education. NCM2QK returned 350,000 of a 700,000 allocation 25 minutes 33 seconds later. “BJ Founders” on NBLIIT’s payment is an unresolved literal memo.

Historical positions after 16 July 2019, not present spendable balances:

Address	Role	Historical KID	Supply share
NA5JKI...	Development fund	7,000,000	33.333333%
NDSTP4...	Education fund	6,300,000	30.000000%
NC6JT7...	Distributor	4,200,000	20.000000%
NCM2QK...	Signer / allocation	700,000	3.333333%
NBDCOH...	Shared project / Foundation signer	698,940	3.328286%
NDMV5M...	Signer / allocation	350,040	1.666857%
NAHLQE...	Allocation wallet	350,000	1.666667%
NBLIIT...	Definition cosigner	350,000	1.666667%

Address	Role	Historical KID	Supply share
NCDYOM...	Allocation wallet	350,000	1.666667%
NCEUKZ...	Definition initiator / levy / signer	350,000	1.666667%
NCJHET...	Signer / allocation	350,000	1.666667%
NBXPW6...	Secondary KID participant; identity unverified	1,000	0.004762%
NBQVQ6...	Secondary KID participant; identity unverified	10.25	0.000049%
ND6D4I...	Secondary KID participant; identity unverified	7.926319	0.000038%
NCIT7A...	Secondary KID participant; identity unverified	1.023681	0.000005%
NBYH5N...	Secondary KID participant; identity unverified	0.8	0.000004%
NADLLJ...	Staging	0	0.000000%
NC7HKO...	Issuer	0	0.000000%
NCYKQW...	Secondary KID participant; identity unverified	0	0.000000%

All prefixes are nonnegative and conserve 21 million. Largest three positions total 17.5 million (83⅓%); six secondary participants retain 1,020. Gross volume 60,901,115.523681 includes forwarding/returns, not distinct supply/revenue. Captured rich list totals 17,501,020 and omits 3,498,980 across eight accounts; historical replay, not that current-looking list, governs these positions. `token_audit.json` preserves the discrepancy.

Initial funding and common signing keys

Confirmed UTC	From	To	XEM	Public message	Transaction
2019-05-28 08:41:33	NBDCOH...	NCYKQW...	10	-	T006
2019-05-28 08:41:50	NBDCOH...	NBGTCB...	10	-	T007
2019-06-11 03:42:43	NCYKQW...	NBQVQ6...	8.29999	-	T008
2019-06-11 03:53:37	NBQVQ6...	ND6D4I...	3	-	T009
2019-07-12 04:14:50	NBQVQ6...	NBYH5N...	2.14	-	T010
2019-06-30 09:40:00	NBDCOH...	NBXPW6...	5	xem for transactions	T011

T006/T007 were created two seconds apart and confirmed 17 seconds apart in adjacent blocks. NBGTCB later funded NCIT7A 1.5 and 8.9 XEM on 3 June; its complete history has 11.6 direct XEM receipts/11.4 outgoing excluding fees, plus control/cosigning records.

The 11 June KID route forwards 20, 20, 10 through NBDCOH → NCYKQW → NBQVQ6 → ND6D4I; first two legs are the same 20, not two identified prizes. NBXPW6 has only 1,000 KID on 23 June and 5 XEM on 30 June with “xem for transactions,” supporting cost assistance. No branch memo identifies a child, winner, merchant or purchase.

Confirmed UTC	Account converted	Threshold	Transaction
2019-05-30 06:17:58	NB3RVC...	2 of 3	T012
2019-06-03 03:17:38	NCIT7A...	2 of 3	T013
2019-06-11 03:53:51	ND6D4I...	2 of 3	T014
2019-06-26 05:12:32	NBQWPY...	2 of 3	T015
2019-07-12 04:17:57	NBYH5N...	2 of 3	T016

Each conversion shares NCYKQW/NBGTCB plus a distinct third key; the two common keys meet 2-of-3. NCIT7A,ND6D4I,NBYH5N transfer KID; NB3RVC/NBQWPY are control neighbors without observed holdings. On seven outgoing KID transactions, third keys initiated and NBGTCB supplied the additional signature; NCYKQW membership was not exercised as cosigner on those seven. Human custody remains unassigned.

Reciprocal movements and payment reconciliation

KID confirmed UTC	KID leg	Reciprocal XEM leg	Separate NCIT7A → NAYIOJ payment
2019-06-11 04:35:53	ND6D4I... → NCIT7A...: 1 KID T017	2019-06-11 04:31:39; 2.421466 XEM back T018	2019-06-11 04:35:53; 0.484293 XEM T019
2019-06-12 04:01:29	ND6D4I... → NCIT7A...: 1.073681 KID T020	2019-06-12 04:01:29; 2.5 XEM back T021	2019-06-12 04:01:29; 0.5 XEM T022
2019-07-12 06:14:40	NBYH5N... → NCIT7A...: 0.2 KID T023	2019-07-12 06:14:40; 0.533328 XEM back T024	2019-07-12 06:14:40; 0.106666 XEM T025

First XEM leg confirms one block before KID; other two groups share a block. Separate NAYIOJ payments approximate 20% of corresponding XEM with atomic rounding, distinct from levy/fees.

The reverse pair below is nine blocks apart, arithmetically 4 XEM/KID, not a public price quotation:

Confirmed UTC	From	To	XEM	Public message	Transaction
2019-07-11 06:53:39	NBQVQ6...	NCIT7A...	1	-	T026

Confirmed UTC	From	To	KID	Public message	Transaction
2019-07-11 07:04:56	NCIT7A...	NBQVQ6...	0.25	-	T027

A 12 June 1-KID movement has 0.0408 XEM to NAYIOJ without a direct XEM return to that sender; later KID events also have parallel payments. Exceptions/shared control support exchange-like operation or testing, not verified independent commerce. Terms and merchant/customer records would distinguish them.

Complete parallel-recipient history:

Confirmed UTC	From	To	XEM	Public message	Transaction
2019-06-11 04:35:53	NCIT7A...	NAYIOJ...	0.484293	-	T019
2019-06-12 03:54:16	NCIT7A...	NAYIOJ...	0.0408	-	T028
2019-06-12 04:01:29	NCIT7A...	NAYIOJ...	0.5	-	T022
2019-06-14 09:34:02	NCIT7A...	NAYIOJ...	0.470419	-	T029

Confirmed UTC	From	To	XEM	Public message	Transaction
2019-07-12 04:48:48	NCIT7A...	NAYIOJ...	0.535658	-	T030
2019-07-12 05:58:41	NAYIOJ...	NCIT7A...	1.98117	-	T031
2019-07-12 06:14:40	NCIT7A...	NAYIOJ...	0.106666	-	T025

First five receipts $2.031170 = 1.981170$ returned $+0.050000$ raw sender fee; sixth 0.106666 follows. Full reconciliation: 2.137836 received -1.981170 returned -0.050000 fee $= 0.106666$ XEM, matching 5 September 2026 balance. All receipts originate NCIT7A; sole outgoing returns there. No external onward transfer appears. Gross receipts are not retained fee revenue; purpose/recipient identity remain unassigned.

Foundation receipts and issuer payments

Flow	Payments	XEM	Historical CAD estimate	Confirmed UTC interval
Foundation SEA → NBDCOH	12	221,287.57	CA\$52,553.72	2018-04-02 01:01:15 to 2019-09-06 17:42:22
NBDCOH → issuer NC7HKO	9	151,894	CA\$38,339.17	2018-04-05 06:24:27 to 2019-03-20 04:36:50

Foundation identifies NASEACH as the former SEA regional account. References below do not name a KID grant. CAD uses transfer-date daily closes, not execution/bank values or approved budget. Nine onward issuer payments overlap mixed balances: adding both categories risks double-counting, and chronology cannot identify particular funds. Last 20,000-XEM onward transfer occurs more than 34 days after nearest 601.3-XEM regional receipt. [S01-S02]

All twelve regional receipts:

Confirmed UTC	From	To	XEM	Public message	Transaction

2019-09-06 17:42:22	NASEAC...	NBDCOH...	3,773.23	SEA/2019/09/01	T043

All nine shared-account issuer payments:

Confirmed UTC	From	To	XEM	Public message	Transaction
2018-04-05 06:24:27	NBDCOH...	NC7HKO...	17,237	calculated at .23 for 4000 USD	T044
2018-05-03 10:47:42	NBDCOH...	NC7HKO...	16,000	For April	T045
2018-05-09 03:43:18	NBDCOH...	NC7HKO...	8,602	-	T046
2018-06-06 00:39:26	NBDCOH...	NC7HKO...	20	May	T047
2018-06-06 00:40:02	NBDCOH...	NC7HKO...	20,000	try try again	T048
2018-07-10 05:26:39	NBDCOH...	NC7HKO...	35	June	T049
2018-07-10 05:27:09	NBDCOH...	NC7HKO...	35,000	-	T050
2018-08-13 04:18:34	NBDCOH...	NC7HKO...	35,000	-	T051
2019-03-20 04:36:50	NBDCOH...	NC7HKO...	20,000	-	T052

T044 memo says USD 4,000 at .23, but 17,237 XEM was sent; division gives 17,391.30. Rates, fees, adjustments and invoice remain missing; no false-payment conclusion follows. Four dedicated staging/distribution/development/education accounts show six positive XEM transfers, gross 518 including internal 108; all senders are in the register. Mixed issuer/off-chain financing remains outside that narrow category. `analysis/xem_links.json` retains classifications. [N-S03]

Issuer also received 460 “Node rewards payout” transfers/183,273 XEM, November 2017-February 2020, alongside other assets. Operator discussion corroborates Supernode payout `NCPAYOUTH2BGEGT3Q7K75PV27QKMVNN2IZRVZWMD` and distinct reserve `NAFUNDBUGI0STMD4BNXL7ZFE735QHN7A3FBS6CMY`; on 11 April 2018 BloodyRookie said he lacked reserve cosigning authority. Reward context is supported, not issuer human identity or each round's entitlement. These receipts are not established KID funding. [N-S01-N-S02]

The 21 July 2019,12:57:10 UTC NEMNodes archive labels exact issuer NC7HKO “Gemdealer -1.0 -User Stake.” Row 188 has 2,128 harvested blocks/4,593,841.05 vested XEM, updated 19 July,01:57:56; its complete row survives in a partial 1,048,576-byte response. Pseudonym is not civil identity/current balance. A 27 January 2014 Gemdealer post cites Bitcoin hash `0f82e6ab178bf6ffa32e6cba30e590c685cda195da133f1563e2f46a20e55eba`; that transaction/redemption mapping was not verified. [ND-01-ND-02]

Shared destinations and exchange-record targets

Address	Observed flow from register accounts	Public attribution and strength
ND2JRP...	12 payments; 1,463,032 XEM; four senders; 2018-2021	Historically corroborated as Bittrex by a DIMCOIN payout statement and a published developer Bittrex API response; no authenticated Bittrex account record obtained
NC64UF...	18 payments; 5,748,124 XEM; five senders; 2018-2022	Customer forum reports label Binance; official NEM integration examples include the address but do not name its operator
NDOYB2...	Issuer 20,000 XEM and NBLIIT 4 XEM on 4 October 2018; identical reference	Possible NEMChange association from memo and third-party label; operator materials explain required deposit messages but do not authenticate this exact address

Fourteen shared external destinations were found; analysis/xem_links.json retains sender splits, messages, hashes. The stronger Bittrex label relies on DIMCOIN's statement/published API response; Binance on customer reports and a NEM integration example not naming the operator; NEMChange remains possible. Service addresses do not identify customers. [S03-S08]

Complete observed ND2JRP payments from the register:

Confirmed UTC	From	To	XEM	Public message	Transaction

Issuer → NCEUKZ 500,000 XEM precedes T058 by 2 minutes 42 seconds; T059 carries the same reference 37503ccaac214a018a2. That pair is a customer-reconciliation lead; repeated 500,000 principal is not additional financing. The 1,463,032 total covers different senders/references/dates and is not allocated to one customer/KID expenses.

Confirmed UTC	From	To	XEM	Public message	Transaction
2018-10-04 04:27:23	NC7HKO...	NDOYB2...	20,000	166 NEMCHANGEDOT COM 166	T065
2018-10-04 04:34:45	NBLIIT...	NDOYB2...	4	166 NEMCHANGEDOT COM 166	T066

The two 166NEMCHANGEDOTCOM166 payments are 7 minutes 22 seconds apart; no KID listing, sale or cash withdrawal is thereby established.

Bittrex Bermuda liquidators' 30 June 2026 update reports platform decommissioned 28 May and directs records to BittrexClaims@uk.gt.com. Official notices distinguish Bermuda/Liechtenstein (ALPS Trust Ltd.). Historical contracting/migration must select the estate; credited customer, trades, withdrawals and settlements remain required. No request was sent. [N-S04-N-S05]

Historical control and production boundary

During KID transfers issuer was 2-of-2(NCEUKZ/NBLIIT), excluding NBDCOH. Distributor/development 3-of-6 and education 1-of-6 shared NBDCOH,NBLIIT,NCEUKZ,NCJHET,NCM2QK,NDMV5M. Staging remained ordinary. Distributor/education received initial KID before conversion; development converted before allocation. Issuer changed to a different 1-of-1 signer in October 2021 after expiry.

Bounded 7 September 2026 verification: education's 6,300,000-KID allocation confirmed at block 2,137,419 (4 May 2019, 08:35:22 UTC). Conversion at 2,137,441 (09:02:26 UTC), hash 9dd108cb37478b4fe959e789816c2c9f11278fac69e39e31e603e71e5e03186a, added six keys and set minimum one. Both same-operator nodes returned matching transaction objects; the terminal page was empty, and both block objects contain matching transaction signatures. Three education records contain no outgoing asset transfer. Fresh account metadata reports education 1-of-6 and distributor/development 3-of-6. This verifies the specified control comparison, not a new full-history replay, valuation, human-key identification or signature/consensus audit. See the KidletCoin/NEM master section 8 and sources V14-V15 for the comparison with Laura's public security advice. Public response bytes and request hashes accompany evidence/video_followup.

Allocation T078 records NCEUKZ as initiator and NBLIIT/NDMV5M as additional signers. Conversion records NDSTP4's pre-conversion key; Laura-associated NBDCOH was an added member, not recorded as signing either transaction. Appearance in a member's multisig history does not prove approval. Human custody and threshold instructions remain unknown. Exact mappings and public responses accompany evidence/remaining_questions/control; verify_education_roles.py --offline reproduces field interpretation without cryptographic signature validation. See master V16.

NBDCOH supplied five KID cosignatures in January-July 2019, then joined old Foundation operating control 26 August. Public wallet-demo, candidacy and first-person 2021 interview connect Laura Takenaka/Walsh and project involvement without establishing every key user. [S09-S11]

Pinned source d8c2e9b3a364734a17bead61f5549672dfb73de6 is customized NEMPay/mainnet; 94 UTF-8 source files contain no fixed matching operational address. Balance/login checks short kid; signing retains full mosaic ID. Display label is therefore weaker than on-chain kidlet:kid; no counterfeit incident is established. Source com.Kidlet.app differs from advertised com.kidletcoin.app; production match remains missing. [S12-S15]

September 6 tree: 202 entries, not truncated; no APK/AAB/IPA, releases, tags or forks returned; Play 404. Ten commits associate with isaganiesteron(3234551), one README edit 8 June 2018 with baconbkk(8854714). These identify development leads, not release signer or civil identity. No binary/quiz backend/redemption record was authenticated. Native Finnish forum post/revision records additionally date circulation of the exact advertised Play URL to 4 December 2018. This is an app-link lead, not an authenticated production

release. The companion investigative memorandum contains the full source/production distinction, integrated contest-consent research and ~~records-retrieval~~ ^{records-retrieval} ~~interview~~ ^{interview}. Its fingerprint-source finding concerns password handling, not a demonstrated biometric database. [K01-K20; KP01]

The contest's 11 June deadline coincides with first 20-KID movement; timing does not identify entrant/payment purpose. Exact searches found no named attribution for secondary common keys/NAYIOJ. No child identity is assigned. Commercial/securities conclusions require actual offers, customers, operator conduct and jurisdiction.

Website/mail custody leads for <https://kidlet.io/> remain separate: 23 January 2019,00:42:41 UTC WARC, IP 162.241.252.29, Apache 406; 645 compressed bytes at 16556837-16557481, SHA-256 108389334fe907fd7caaab8e9b7780d4dfec6f6fd2b2ae04ac0cf5ce3414332f. Current Unified Layer/BLUEH-2/PTR box5680.bluehost.com does not establish historical provider/customer/country. Certificate 1394242687 (Authority X3), valid 17 April-16 July 2019 at 15:11:11 UTC, covers kidlet.io,www,mail,webmail,autodiscover,cpanel,webdisk; DER SHA-256 C64D61F37E8C63086B2ADE36A03AE64D797EEC6D292BB51B945EA209B91F0930. Dates/names were parsed; independent certificate-chain validation was outside scope. An additional 21 April 2019 Common Crawl WARC confirms the same IP and 406 server response closer to the contest. It adds a provider-search parameter, not an inbox record. Provisioned names prove neither received entries nor mailbox access. [KP02] Proposed curriculum contributions and later certificates likewise establish no entrant, key owner or prize. [KD01-KD07; K12-K20]

Native-XEM balances above come directly from the dated account-state refresh; they are not KID balances, project-owned cash totals or current dollar valuations. The reports preserve retrieval timestamps per account. Some accounts are multisig signers or institutional accounts with broader activity.

Institutional reserve mapping and later custody

The report generated 30 March 2021,07:32:39 UTC, captured 16 June 2021,17:31:57 UTC maps three NIS sources to 125 distinct Symbol addresses. [ND-04]

Source NIS account	Displayed XEM
NATRUSTUAB5LAWDSOWDUPQUFYRTGZTJZDGML2JKP	1,424,848,818.491020
NANODESTSN7GU76QPLGMJ7BCGCAA2PHVBZZUUI62	18,983,656.691000
NBKXLNQ2GKTLQBTXNFOHULNJDA7T2Q57CZGQ2TFP	234,150,985.700000
Displayed source sum	1,677,983,460.882020

Targets total 1,677,983,460.920000 XYM; displayed-total difference 0.037980. Independent Decimal arithmetic verifies the published table, not fresh balances/spending. The exact 125 row/address/amount cells are preserved in KIDLET_NEM_SYMBOL_ALLOCATION_125_ROWS_2021.csv and original archived_reserve_mapping_row1.json; no target is omitted from the evidence.

The 18 August 2021 statement identifies Gibraltar's NEM Group Trust and proposes approximately 1.2 billion XEM/770 million XYM for a Swiss foundation. Gimre disputed it and said negotiations continued 20 August: no executed award established. Its NBL0CKYZLCBV02XF2DB3D74AE2RC5WSHX5JEZ0ID rewards account differs from March's third source. Public-table gap is solved; later mandates, custody, spending and executed asset/IP/staff transfers remain missing. Portuguese captures/redirects/revisit records supply no signed instruments; three NEM Ventures legal links returned 404, with IDs retained as leads. [ND-03; ND-05; ND-13]

July 2022 Foundation resolution directs surplus after liabilities to a qualifying Singapore charity/Institute of Public Character chosen under regulation 82(2); 29 August notice scheduled 29 September final meeting for accounts/record disposition. Mirror copies identify destination class and scheduled decisions, not actual receipt or destroyed records. [N-S10-N-S11]

The separate IRS-hosted 28-page 2022 Form 990 for Delaware's 2022-formed Symbol Syndicate (EIN 88-0622815) names Kristy-Leigh A Minehan, President/CEO; signed 17 November 2025. USD contributions/grants 1,996,243; revenue 1,996,291; expenses 986,825; assets 1,009,540; liabilities 74. Page 12 answers No to independent compilation/review and audit. This US return neither supplies Singapore Foundation's audit nor identifies Swiss settlement/liquidation beneficiary or purpose of 21 selected payments. Foundation, Trust, NEM Group Trust, NEM Community Trust, proposed Swiss foundation and US Syndicate remain distinct. [ND-06]

Evidence and remaining questions

The companion evidence includes raw/normalized histories, terminal-page provenance, KID index, selected blocks, lifecycle/controls, source captures, calculations and SHA-256 manifests. Earlier chain/CAD packages remain named dependencies; normalized-summary.json gives final 24-account scope. The 125-target CSV preserves displayed values exactly and has a separate provenance/arithmetic record.

Required bridges: contracts/invoices/approvals for twelve regional and nine issuer payments; dated key mandates; customer records for exact exchange address/reference pairs; reciprocal software/terms and merchant settlement; actual contest receipt, consent and payout records. Blockchain proves ordering, amounts and configured/signing authority; these missing records must establish purpose and counterparties.

Transaction reference register

Search the full 64-character hash in the NEM explorer; the table preserves every reference. The canonical transaction URL is: https://explorer.nemtool.com/#/s_tx?hash= followed by the hash.

Evidence dates and edition integrity

Original source: KIDLET COIN_COMPLETE_HISTORY_AND_LINKS_2026-09-05.md, SHA-256 d57f97095dc4a6a8aa76e8d5ce5aa827f410c2f20842c8fb9554f5bad1e4601b. Evidence: KIDLET COIN_COMPLETE_HISTORY_EVIDENCE_2026-09-05.zip, SHA-256 ac4507db4adad3dd69c61456cbd425e538ca7c0bec379484e16f13a2aed3d5cc. Prior edition records 406 payload hashes checked; this revision does not claim a new archive download/revalidation.

The 6 September source was reconstructed from the surviving 29-page PDF and reconciled against 28 KID transfers, 90 references and 24 dated account rows. Its four vector graphs were recovered at 300 DPI. This 7 September revision consolidates repeated prose and relocates 125 Symbol rows to exact CSV; all original image paths and ledger/account/hash rows remain. Full-ledger/valuation date 5 September; documentary additions 6-7 September; bounded education-control check 7 September. Document ID

September 6 research source register - added records

The following prefixes identify the new documentary sources. They do not alter the original S01-S15 and T001-T090 registers.

September 7 source and scope clarification

No new NEM chain replay is claimed. The earlier app-link and server records narrow provider requests; they do not identify a contest entrant or change any transfer purpose.

- **KP01:** <https://forum.bittiraha.fi/posts/37866.json> ; <https://forum.bittiraha.fi/posts/37866/revisions/2.json> . Native original post: 4 December 2018, 07:17:34.620 UTC.

- **KP02:** <https://index.commoncrawl.org/CC-MAIN-2019-18-index?url=kidlet.io%2F&matchType=domain&output=json> . WARC retrieval, byte range and verified digests are retained in the accompanying contest evidence and investigative master.
