

Laura Walsh / Takenaka: crypto roles

Historical source edition | 7 September 2026

Public crypto research edition. The following material preserves historical analysis, source identifiers, transaction amounts and stated qualifications. Observations retain their original dates, principally 5-7 September 2026. Preparing this edition did not repeat the blockchain, corporate-registry or legal research.

Read each assertion with its cited source and limits. A public role, a wallet connection or a valid transaction does not by itself identify a human operator, prove personal receipt or establish wrongdoing. The reports distinguish findings, interpretations and unanswered questions.

Correction precedence: the 7 September 2026 ShibaFriend claims review reports repayment of the principal of all 23 non-dust funding addresses, with only 168 base units of dust unmatched. It also reports equal project matches for all 194 identified paid Mystery Box mints. Those later findings supersede earlier uncertainty about those specific questions. See [Research_Paper_ShibaFriend_Claims_Review.pdf](#).

Original source-page labels and reference identifiers are retained where useful. Gaps in numbering reflect the crypto-only scope. Historical references to companion records are locators; consult the repository inventory to see which records are included. Current availability of an external source is not guaranteed.

Conclusion and use

The record contains attributable promotional statements and serious, precisely identified financial events. It does not establish that Laura controlled the November GMI withdrawals or personally received the seven project payments. The original FOMO principal-refund question is now resolved: all **27 funders** received their full recorded contributions. Time Raiders' exact BUSD amount was located at its original recipient at a dated September 2026 block. These corrections govern entries 17 and 23; unresolved settlement elsewhere is not a proven theft total.

Each issue identifies the event, Laura's actual connection and the decisive missing record. Named statements, project publications, technical traces, source interpretations and associated-business issues have different evidential weight. Professional records connect Walsh and Takenaka through linked profiles; no reason for a surname change is inferred. [R76]

KidletCoin and NEM

05 Soliciting linkable information from children for token rewards

The contest invites ages **8-18** to send **video link, public wallet address, name, age, email and location** to **info@kidlet.io**, offering selected videos **20-30 KID** and channel publication. Upload metadata says **2 June 2019**, deadline **11 June**; complete later-editable description is independently captured **10 December 2022**. Face/voice was not expressly mandatory; location is not necessarily home address/GPS. Either Kidlet or generic NEM wallet was permitted; an award depended on selection. No usable spoken transcript was recovered. [R135]

Laura's adult planning, recruitment, wallet-release and curriculum involvement are documented, but contest author/approver/inbox administrators are unidentified. The coincident first **20-KID** transfer is not an identified child's award. **Records needed:** actual entries, required data, responsible adults, guardian/publication permissions, selection decisions and reward payments. **Sources:** M02 pp3-6, S001-S014; R08-R09.

06 Missing visible parent-consent and data-handling instructions

The recovered description has no parent-first step, consent procedure or linked contest privacy notice. Actual submissions would link identity/video/age to a public wallet. Historical footer links point to actual policy paths, but their bodies remain unrecovered. Matching April/July 2019 YouTube contest rules required official rules and a data-use privacy notice; this supplies a historical platform standard, not proof Kidlet had no separate notice. [R135] This establishes a public-notice gap, not that every private safeguard was absent or Laura was data controller; an **info@** address does not prove a public inbox/plaintext storage.

Common Crawl records **kidlet.io / 162.241.252.29, 23 January 2019 00:42:41 UTC**, as an Apache/ModSecurity **406 rejection**, not policy content. An additional **21 April 2019** WARC confirms the same server/IP rejection closer to the contest. A certificate valid **17 April-16 July 2019** names mail/webmail/autodiscover/cPanel hosts. Current Bluehost/Unified Layer ARIN/PTR leads do not establish the 2019 mailbox provider, provisioning, entries or retention.

Records needed: historical notices/consent, processing dates/places, mailbox access/forwarding, retention/deletion, processors and publications. **Sources:** M02 pp6,18-20, S013-S014/S046-S050; M21 Kidlet; R08-R10/R111-R113.

07 Credential-handling and disclosure defects in wallet source

Pinned commit d8c2e9b3a364734a17bead61f5549672dfb73de6, **8-9 June 2018** source history: fingerprint customization stores the wallet password in ordinary Ionic Storage and logs it before authentication. Other source concerns are private-key clipboard exposure, public PlainMessage without visible permanence warning, mainly HTTP nodes, and short-name mosaic matching in login/balance paths; transfer signing retains the full identifier.

Laura discussed a NEMPay-fork release, but code authorship, defect knowledge and credential access are unassigned. Source com.Kidlet.app differs from promoted Play com.kidletcoin.app; no signed production binary is matched. Native forum revision history dates circulation of the advertised Play link to **4 December 2018**; it does not authenticate the distributed binary. The fingerprint-source finding concerns password handling, not demonstrated collection of fingerprint images/templates. [R136] Ten commits associate with isaganiesteron, one README edit with baconbkk; this is not implementation authorship. No binary in the **202-entry** pinned tree; returned releases/tags/forks empty, not proof none existed.

Records needed: signed APK/AAB/certificate, reproducible build inputs, runtime logging, affected users and review/remediation. No credential interception, automatic contest-bundle upload or child-identifying chain message was demonstrated. Quiz/backend remains separate. **Sources:** M02 p7/S015-S018; M03; M20 Kidlet K01-K11; R11.

08 Promised spending utility and incomplete lifecycle delivery

2018-2021. Publicity proposed KID learning/work rewards and shopping. One **June 2019** interview describes shopping available; Thai/Japanese/Hong Kong accounts describe future store/partners. No merchant contract, redemption order, conversion right or fiat peg was recovered. NIS1 records show **21m fixed KID, 28 indexed transfers**, calculated namespace expiry **2 May 2021**. Weak price alone does not prove dishonesty.

A wallet release was announced and **111-page curriculum** distributed **July 2020**, immutable upload **30 June**, associated with **D K / @kln_nurv**, not authenticated Laura authorship. The PDF contains no recovered child-data form, executable launch or script; editable ODT was recovered. msali123 / baconbkk proposals were not merged into published ancestry; handles do not prove cross-platform identity. UN material traces Skinner/e27; IB repeats a story while mislabelling rewards bitcoins. These are citation histories, not grant/redemption tests.

Records needed: merchant/redemption/maintenance decisions, quiz beta/backend, curriculum commissioning/payment and dated human domain/channel control. Attribute each readiness statement separately. **Sources:** M02 pp4-5,8-9/S009-S012/S019-S023; M04; M20-M21 Kidlet; R69/R114-R116.

09 Shared project authority and Foundation payments

2 April 2018-6 September 2019: twelve Foundation regional receipts total **221,287.57 XEM**, estimated **CAD 52,553.72** at historical daily closes, into a Laura-associated mixed-use shared signer. Project/Foundation signing relationships are documented. No invoice/grant reconciliation assigns all receipts to KID; shared authority does not establish exclusive custody or retention. This is not a documented **CAD 50,000 Kidlet grant**.

Separate **460 issuer receipts / 183,273 XEM** are strengthened by contemporary Supernode discussion identifying payout account NCPAYOUTH2BGEGT3Q7K75PV27QKMMVNN2IZRVZWMD. They are not additional SEA receipts. The **21 target SEA/issuer payments** still need explanation.

Records needed: twelve referenced payment/expense files, nine issuer-transfer purposes, contracts, approvers, payees, conflicts, key custody and final expenditure. Avoid counting forwarded principal again. **Sources:** M02 pp10-13,20-21; M03; M05; M20 NEM N-S01-N-S03.

10 Expense reporting and reserve governance

The Foundation acknowledged accountability/runway problems. Its 2019 report prints **43% technology**, while **USD 1,848,635 / USD 6,770,159 = 27.3%**; **USD 1,428,843 related-party** costs lack recovered KID/Thailand breakdown. On **12 March 2020**, **LauraBKK** assured expenses were reflected in the ROI report. Her interim-secretary/later council-secretary roles and assurance are documented; authorship of the percentage and control over all reserves are not.

The February 2019 publication promised conflict/best-interest/information-sharing policies and CFO releases with ExCo/Council approval. Exact policy IDs survive but copies returned **410**. September summary reports acceptance of the 2018 audit/appointments; signed minutes/audit remain absent. For the **210m-XEM** reserve allocation, actual mandates/disbursements remain required. The **2022 wind-up** notices identify liquidators/proposed qualifying Singapore charitable-recipient process, not actual recipient/transfers. US Symbol Syndicate Form 990 is a distinct record.

Separate **NEM.IO Trust** notices identify the **4 June 2021** surplus-resolution and scheduled **10 September 2021** final meeting/records-disposal decision. They provide additional liquidation-record targets, not actual recipient receipts or proof records were destroyed. Keep them separate from the Foundation's 2022 wind-up. [R137]

The **30 March 2021 report**, captured **16 June**, maps three NIS sources to **125 Symbol addresses**: **1,677,983,460.882020 XEM** versus **1,677,983,460.920000 XYM**, a **0.037980** displayed difference. This recovers the table, not downstream spending/current balances. The **August 2021 Swiss award proposal** was disputed and remains unexecuted in recovered evidence; Foundation, Group Trust, Community Trust and US Syndicate remain separate.

Earlier public accountability position: On **14 November 2018**, Laura advocated publishing bylaws, a roadmap, voting records subject to privacy, and meeting minutes/summaries, while saying she was not yet on Council. In the endorsement uploaded **7 December 2018 UTC**, **Alex Tinsman**, the speaker, credits her with a transparency platform (**0:24-0:35**); these are Tinsman's claims, not Laura's speech. Compare these stated standards with actual governance records. The current KidletCoin/NEM master section 13 supplies the direct-post context. [VNEM-L2-L3]

Records needed: report definitions/ledger, Laura expenses/approvals, related parties, signed accounts/minutes, reserve transfers and wind-up settlement. **Sources:** M02 pp14-17,20; M03; M20-M21 NEM; R60/R117-R121.

11 Project promotion alongside institutional duties

Laura worked on KID while holding NEM roles; **May 2019** update assigns shared communications/media duties, and NEM channels promoted KID/joint **November 2019** appearance. Her associated key explicitly cosigned **five KID transfers**, joined Foundation operating signers **26 August 2019**, and appears in **358 later actions: 354 outgoing transfers / four control changes**. This is exercised technical authority, not exclusive human custody. **Eleven of twelve** regional receipts precede that Foundation signing role; incoming receipts were not initiated/cosigned by the recipient key.

The family relationship was disclosed; **November 2018** election discussion recognized candidacy/KID overlap. Neither replaces conflict declarations, recusals, staff-time allocation or independent approvals. Positive institutional evidence includes Malaysia ministry **9 November 2018 e-Scroll launch**, implementer's next-day issuance claim, and LPU's retrospective **2018 elective**. These do not settle SEA invoices or Laura's role in each delivery; later IIUM Ethereum work is not continuing NEM deployment.

The Bit:Talk interview, uploaded **11 December 2018 UTC**, records Laura explaining multiple approvals (**5:50-6:26**), referencing her daughter's project (**7:05-7:17**), and describing community funding (**12:17-13:10**). [VNEM-L1] This supports knowledge and disclosed involvement; it does not identify contest approvals, consenting families, payment purposes or later GamiFi signers. Both videos' English captions are automatic and contain recognition errors; timestamps are review locators. Neither clip establishes an intentional lie. The current KidletCoin/NEM master section 2, **Recorded NEM statements and council endorsement**, contains the full timestamp matrix and source limits.

The KidletCoin/NEM master sections 8, 12 and 15 now distinguish wallet membership from setup signers, identify Ventures' stated Operating Costs Fund source, and narrow Laura's role in partnership support and

communications. The course launch, hub opening and remaining delivery gaps retain dated evidence and limits.

The **30 June 2019** Foundation update also reports Laura and Jason Lee as **non-remunerated NEM Malaysia directors**; obtain exact entity, appointment dates and mandates. The separate claim that bank evidence and more than 70 contracts had been reviewed was posted **3 July 2019**, not June. Neither classifies the twelve SEA receipts. [R137]

Lower-weight corrected notices: **27 March 2019** LauraBKK accepted correction of the Community Fund/NEM Ventures description; **13 January 2020** branding-committee-signed ticker notice says **3 PM / 1 PM PST**. Sole authorship/vote effect are unproved; no election-manipulation finding follows.

Records needed: conflict/recusal, employment/sponsorship, editorial/resource approvals and dated key mandates. **Sources:** M02 pp4,10,12,17,21; M03/M11; M20-M21 NEM; R59-R60/R67-R68/R122-R124.

12 Mixed-use onward funds and exchange leads

Nine shared-signer→issuer payments total **151,894 XEM**, historical estimate **CAD 38,339.17**; separate **100 XEM** explicitly says **For KID**. On **6 March 2019**, **500,000 XEM** passed issuer→intermediary→historically Bittrex-attributed address **2m42s** later. A later **300,000 XEM** used the same reference 37503ccaac214a018a2. Broader five-wallet route: **5,748,124 XEM** to Binance-labelled destination, historical **CAD 784,624.39**. Two 500,000 legs are one principal; mixed-use activity is not established KID revenue/Laura income.

Small reciprocal KID/XEM moves may be exchanges/testing among shared-control accounts, not independent customer prices. The levy is **0.00001 XEM**, not ten. A **July 2019 NEMNodes** capture labels the exact issuer **Gemdealer - 1.0 - User Stake**; a **2014** subscription statement supplies a stake-origin lead, not civil identity or redemption mapping. Bermuda Bittrex liquidators report decommissioning **May 2026**; historical customer entity/migration must be identified before assuming Bermuda jurisdiction.

Records needed: reference/hash-based exchange credits/trades/payouts, source purposes, custody and beneficial recipients. Do not add overlapping routes or value KID at XEM prices. **Sources:** M02 pp11-13; M03/M05; M20-M21 NEM; R61-R63/R125-R126.

GamiFi: representations, delivery and financial tracing

13 Laura's token solicitation and assurance statements

The **23 February 2022 MEXC** publisher record attributes GMI purchase directions, staking/allocation and fundraising promotion, legal vetting and a **PeckShield token-contract audit** assertion to Laura. It says legal documents must be submitted/signed before first-project announcement and NFT access still requires first-come purchasing. **28 February** issuer release carries her endorsement of GAMI with a **USD 100,000 target**, not receipts.

The original capture **23 February 2022 10:25:42 UTC, 8m58s** after publication metadata, and an October comparison resolve the earlier indexed-only limit. Editorial differences remain; this is publisher-attributed speech, not original-recording retranscription or private approval. No auditor-issued GamiFi report was recovered; catalogue absence does not exclude private engagement.

Records needed: original recording/approval, actual fundraising, diligence files, auditor contract/version/date/findings/remediation and Laura's knowledge supporting her assurance. **Sources:** M06 pp8-10; M07/M08; M21 fundraising; R12-R14/R78-R79.

14 Launch forecasts and paid-access delivery

Laura forecast the first **four IDOs in March/early April 2022**, allowing market-driven changes. On **4 May**, the company reported **two IDOs** and extended Golden Tickets, promoted for **three IDOs or three months**. This supports a shortfall/changed utility period, not zero delivery or a knowingly impossible promise.

Avark's own case study identifies application/staking/NFT/mini-game development; GamiFi's **19 August** post names **Hexagon Fall, Neon Pong, Pac-Rat, Indiarra**. Complete payloads, reward execution and

acceptance remain unresolved. Correct Time Raiders Steam ID **2410900** was not yet available at the **6 September 2026** check; this does not settle other-platform beta delivery.

Records needed: pipeline/diligence, accepted access terms, launches/redemptions, delay knowledge/notices and delivery of extensions. Laura's forecast is named; later team notices are not personally assigned. **Sources:** M06 pp4,8-10/S004-S005/S017/S022; M07 GF02; M20 W5-W8; R12-R15.

15 Valuation, prices and allocation versions

The litepaper gives **18m circulating GMI × USD 0.03 = USD 540,000**, versus **USD 577,500** printed, a **USD 37,500** difference. **USD 20m** private valuation was corrected to **USD 18m**; Time Raiders **USD 0.22→USD 0.022**. GAMI targets vary **USD 150,000/100,000/50,000**; app **14 March** shows 150,000, **28 March** 50,000. TGE/vesting moved **21 March/21 April→28 March/28 April**. Participation thresholds doubled with unchanged ticket counts; **31 January** notice explained the increase.

The **14 March Time Raiders** object gives **USD 0.022, USD 150,000, 15% TGE and six-month linear vesting**. These are publisher versions, not proof a buyer paid incorrectly. The **USD 3.055m financing plan** remains a plan until reconciled to receipts. Laura was CEO; calculations/edits/approvals are unassigned.

Records needed: approved models, operative terms/change notices, buyer acknowledgments, executed allocations, actual price/receipts and reliance/exposure. **Sources:** M06 pp4,6-9/S003/S005-S006/S009-S012; M20 A4-A6; R16-R18.

16 High yields, locks and later settings

Materials advertise up to **225% APY**. The **3 February 2022** article gained a warning that locked GMI cannot also qualify for IDOs; an app describes **60-day pool / 45-day lock**. May public caps increased with **150%/175% APY** retained. **23 August** announces **nine-month/75% and twelve-month/100%**, caps and reward requests with **24-hour cooldown**. Durations/caps/some warnings existed; APY is not 225% in thirty days or guaranteed fiat profit.

Prelaunch archive and historical configurations strongly associate the two later staking sources: start **24 August 12:00 UTC, 2.5m GMI per wallet, 86,400-second** initial delay, **270/360 days**, approximately **75%/100% simple annual reward**. No frontend object directly names them; this is configuration inference. Code does not automatically compound. On **9 May 2023**, owner shortened both ends and removed delay for subsequent requests.

Records needed: offers→deployed parameters/reserves, compounding/exits/fees, user notices/consent, rewards and personal approvals. Laura promoted staking, but each term/change is not assigned to her. **Sources:** M06 pp6-7/S013-S014; M07 GF04; M20-M21 blockchain; R19-R20/R80-R81.

17 Canceled offerings: original FOMO refunded, Shibafriend choices open

Original FOMO v1/project 8 is fully refunded. The **23 May 2022** notice delayed TGE to Q3/promised refunds. Full census **34 funding events / 27 addresses** exactly matches **3,775.228767123287671432 BUSD** paid back to those addresses. Project withdrawal **11:50:16**, recipient returned funds to administrator **11:56:31**, batches paid **two / 25 funders at 15:23:53 / 15:37:05 UTC**. Every aggregated contribution matched, with independent receipt checks. This resolves that cohort's principal, not later FOMO v2/project 1, legacy migration, seed/private claims, staking/NFT obligations or other losses. September distribution post concerns the later offering. [M22 E03; R128-R130]

Shibafriend: 29 June cancellation of the next day's public IDO cites tokenomics changes/insufficient time to update contracts and notify. Choice was **refund OR private-allocation SHF + 1,000 GMI**. The original withdrawal was **22 June**, before the notice. Full census: **27 funding events / 26 addresses / 4,720.231567727363184247 BUSD**. Two June 27 pooled-wallet payee overlaps do not match contributions and do not establish refund elections/settlement. Another-venue context includes Gagarin **10bn/18% TGE**, KingdomStarter **1bn/30%** and reversal of announced Coinstore lock; these are separate cohorts.

May/June publications fall in Laura's tenure without identifying her as author/decision-maker. **Records needed:** SHF elections/allocations, 1,000-GMI payments, actual token/refund receipts and decision

approvals; separate ledgers for later FOMO. ClaimBack returning participation GMI is not a BUSD refund.

Sources: M06 pp7,9,11/S015/S023/S028-S030; M07 GF03/GF05; M20-M21 F05-F09; M22 E03-E05; R21-R22.

18 Mystery Boxes and matching-burn continuity

Episode33 / 1 July 2022 identifies Laura discussing the burn initiative. The **2 July** offer carries both **1,000 / 500 boxes** across twelve captures. Matched deployed code implements actual buyer/contract contributions and a separate owner-mint route. At the **September 2026 sample**, Mystery reserve was zero and read-only purchase simulation reverted before payment. This does not date depletion; mechanism/issuance are real, and supply alone does not measure missing burns. Laura's promotion is documented; article authorship/later reserve authority are not.

A historical `memberCard()` call at the **23 March 2022** withdrawal links the original project to membership NFT; supply is **100** at March 2022/September 2026 endpoints, not proof of 100 paid buyers or complete mint/burn history. Public client code defines account/wallet/participation/NFT-use records; no database was queried. Source-only treasury association is not matched to the historical membership implementation.

Records needed: offer approval, historical purchases/mint routes, matching burns/reserve/owner movements and upgrade custody. **Sources:** M06 pp5-6,8-10,12-13/S008/S024/S043-S044; M21 human; R23-R24/R82-R84.

19 Promotion and reported personal business interest

29 August 2022: GamiFi promotes MegaFans without mentioning Laura's personal interest. Her self-reported profile dates adviser/seed-investor involvement to **May 2022**, overlapping CEO tenure. This is a focused disclosure lead, not proof she diverted GamiFi money. The article names no Laura authorship/approval/compensation.

Records needed: investment/adviser agreement, dated beneficial holding, compensation, commissioning/approval and conflict policy; assess full-campaign disclosure and materiality. **Sources:** M07 GF07; M11/M12; R25-R26.

20 Post-succession offers and continuity

GamiFi names **Eleanor Rooney CEO 1 September 2022**; her **3 October** update pauses IDOs. **4 October 2023** archive still offers **100-BUSD NFT / three IDOs or three months**; **25 July 2024** retains the 2022 roadmap; **14 May 2025** shows an adult portal. Retained offers do not establish successful later purchases, and pause is not dissolution. Later rebuild/reward messages need their own settlement review.

Portuguese team captures list Laura **January/February/May 2022**, Rooney **7 September 2022 / 23 January 2024**, despite stale Laura podcast text. NFT owner transfers: **28 April 2022 10:46:31 UTC**, original GMI deployer→**0x14cc...b412**; **19 September 09:51:41**, 14cc→**0xf27f...c27b**. Receipts/events/adjacent state agree, identifying keys, not people.

Records needed: successor mandates, customer notices, sales/refunds, domain handover/renewal and service outcome. Laura's former title does not attribute later adult content, treasury or publishing. **Sources:** M06 pp8-11/S019-S020/S025-S035; M09; M21 corporate/human; R27-R29/R82-R85.

21 November withdrawals and later pool backing

5 November 2022 UTC: 06:14:38 three proxies temporarily upgraded, maximum GMI allowance granted, original implementation restored; **06:45:09, 23m +14m +7m GMI** removed and combined **44m** sold for **5,174.293394 BUSD**. Relevant Safes required **one owner signature**. Keys/technical authority are established, human instructions/entitlement are not; this follows the September CEO succession. [R30-R32]

Launchpool's **14m** withdrawal left original obligations unchanged. Before block **22,786,456**, obligations/balance both **14,923,065.568267084392219941 GMI**; after, balance **923,065.568267084392219941**. At block **120,235,949, 6 September 2026**, obligations **14,000,207.412329404181026961**, balance **207.412329404181026961**: again exactly **14m short**, without claiming a constant deficit at every intervening block.

Matched StakingV3 identifies the **23m/7m** sources as principal-backed staking pools; counters did not fall. Immediate shortfalls **23,752,892.530640167718196356 / 6,715,483.919657720178350003 GMI**; larger pool already **752,892.530640167718196356** short. Ordinary same-token owner withdrawal preserves principal; temporary allowance bypassed that calculation. [R81]

A fresh pinned check identifies a separate **30 September 2022** reward claim: **125,872.046190324849771871 GMI** paid through ordinary `claim()` consumed a **66,957.869591263448728437 GMI** principal-only surplus and left a **58,914.176599061401043434 GMI** principal shortfall. The principal counter did not change. This narrows the earlier-shortage mechanism, but does not prove first-ever shortage, claimant wrongdoing or Laura's control; it postdates the announced September 1 replacement. The GamiFi master contains exact state and code verification. [R138]

On **15/17 May 2023**, six payments from the replenisher total **46.02m GMI: 30.01m larger /16.01m smaller**. Final **6m** restores smaller-pool recorded-principal backing, surplus **2,401,856.555406618092192559**. Larger remains **15,531,357.317956608042669419** short at block **28,290,015**; later sampled shortfall **13,857,766.118460738573556824**. Smaller later balance exceeds principal. Neither is customer-by-customer reward settlement. Complete inflow window **28,090,000-28,319,999 /10-18 May 2023** shows no matching Launchpool inflow; distinct contracts must not be treated as repaired together. [R86-R91]

Records needed: dated keys/handovers, signer instructions/approvals, business purpose, end/delay changes, full claims/rewards and replenisher custody. **Sources:** M08-M09; M20-M21 blockchain.

22 The 120-million-GMI private allocation

18 January 2022-February 2023: private vesting funded **120m GMI** for **0x3604...b4d4**. **Five payouts** now total exactly120m; three additional claims resolve the earlier **107.87m** gap. Beneficiary GMI inflows/outflows reconcile. Direct sales produced gross received-asset value about **USD 10,226.39 /CAD 13,755.46**; claim-time marks **USD 22,859.76 /CAD 30,902.87** are not cash.

The wallet is not identified as Laura's; a storage category does not identify person/investor class/entitlement. Vesting is not inherently improper. **Records needed:** allocation/subscription/payment agreement, beneficial owner, custody, disposal mandate/restrictions. Separate actual outputs from marks, recycled liquidity and exchange deposits; they overlap. **Sources:** M08-M09; R33-R34.

23 Seven project withdrawals: settlement, delivery and control

10 March-22 June 2022: seven withdrawals total **63,001.817377359365034843 BUSD**, historically marked near **USD 63,019.16 / CAD 79,740.69**. This is a transfer total, not proven theft. All seven used the designed `withdrawFunding(uint256)` function after funding ended, paying the full funded amount to the configured receiver. Withdrawal flags changed `false→true`. Both historical implementations were independently compiled and fully matched (**14,983 / 15,877 bytes**). March calls used owner authority; the May/June caller `3e0f` was an enabled administrator under owner `14cc`. Technical permission does not establish business authorization. [M22 E01-E02]

Original project	Exact BUSD	Current finding
8 - FOMO	3,775.228767123287671432	All 27 funders received exact refunds; entry 17.
7 - Time Raiders	23,722.715761539594859905	Matching BSC recipient balance located; all 80 funding addresses matched to Polygon buyer allocations and actual initial distributions. A distinct 2025 withdrawal is explained below.
6 - GAMI	28,421.141280969119319259	Proceeds moved through 56aa to pooled 35b on 17 May 2022. All 127 funding addresses have exactly matched GAMI allocations with remaining backing.
9 - ShibaFriend	4,720.231567727363184247	Proceeds moved through 56aa to pooled 35b on 22 June 2022; buyer elections and settlement remain open.

Original project	Exact BUSD	Current finding
1 / 3 - unidentified	252.5 / 110	Configured owner/caller 8fea received both.
4 - unidentified	2,000	Exact-amount funding route returns to 35b after a deliberate receiver change.

Time Raiders BUSD: block **120,394,077, 6 September 2026 23:55:32 UTC**, locates the exact original amount at d2b8. Pin hash: 0x779aaa476a63ca5f06ca65989f33617ab4851f24970f9114a9182c6cbbba8b809. Its two ordinary signed transactions include **286,013.071750000025796608 GMI on 24 January 2022** and **0.03854508 BNB to f4f on 4 November 2022**; neither transfers or approves BUSD. This does not establish continuous immobility, current key access or a complete delegated-movement history.

GAMI delivery: the 555,555 GAMI routed through 56aa and 3e0f on 28 March reached the published claim contract. All 154 funding events, totaling the original BUSD withdrawal, match 127 addresses' aggregate allocations of **284,211.41280969119319259 GAMI** exactly. At block **120,402,387, 7 September 2026 00:57:54 UTC**, 53 of those addresses were fully claimed, 62 partly claimed and 12 unclaimed. Their remaining **110,667.396436497796045799 GAMI** is included in fully backed contract obligations. Claimed figures are contract counters; this GAMI lane has not reconstructed every historical payout receipt. Token 0xf0dcf7ac48f8c745f2920d03dff83f879b80d438 is distinct from GMI.

The same setup assigned **271,343.58719030880680741 GAMI to 30 other addresses**, absent from the complete ID6 funding census. Their entitlement and consideration need records. They did not reduce the original buyers' recorded amounts. Across all 157 records, remaining **290,789.005821999944860026 GAMI** equals the contract token balance exactly. The advertised USD 0.10 price is no longer needed to infer allocations: actual funding-event and vesting records match directly.

Pooled funds: GAMI and SHF proceeds total **33,141.372848696482503506 BUSD**. Before the respective ID4, GAMI and SHF receipts, 35b already held **283,305.280000000000000012**, **183,169.280000000000000012** and **131,015.421280969119319271 BUSD**. Its ten 27 June payments total **39,970 BUSD** within blocks **18,908,374-19,100,000**; they do not match a proven SHF refund schedule. The expanded inventory now verifies all **184 signed transactions, nonces 0-183**, and **301 selected token events**, with eight exact BUSD balance checkpoints.

On **3 August 2022**, 35b sent its entire BUSD and USDC balances to administrative address 14cc: **26,626.652848696482503518 BUSD** and **2,302 USDC**, plus **390.50307622 BNB**. On 4 August, 14cc separately supplied **200 BNB** that 35b converted into **60,439.274293674825498827 USDC** and returned. Counting that return again as offering proceeds would double-count a different funding leg. A **20,000-BUSD payment to f4f on 30 May 2022** supplies an earlier connection to the later private-allocation onward route.

ID4 funding circle: 35b sent **2,000 BUSD to 3604 at 10:52:07 UTC on 11 March 2022**; 3604 sent **2,000 to 391a at 10:54:34**; 391a funded ID4 at **10:55:04**. On 23 March, 3e0f changed ID4's receiver from 8fea to 35b at **14:56:37** and withdrew **2,000 at 14:58:07**, nonces 117-118. Setter hash: 0x39f7777f43b5155f7238fa822d796206ddcd74e0b27481c78f33b7debff00f8cc. The sole funder is 0x391a51d884b240908a88e1e757ec42189d294423. The 35b wallet also supplied its participation GMI and gas; the 10,000 GMI had arrived from 3604. This is an exact-amount transaction linkage, not proof of common human ownership or unique fungible-unit tracing. The business purpose and ultimate source of pooled funds remain unresolved.

IDs 1, 3 and 4 used 300-block windows; a test purpose is unproved. Four mapped projects total **60,639.317377359365034843 BUSD**. GAMI/Time Raiders application captures predate withdrawal; FOMO/SHF captures postdate it. Original IDs are distinct from later v2 FOMO/ID1 at 0x8b65...5f48.

Distinct Polygon event - 13 November 2025. All 80 original Time Raiders BSC funding addresses received initial XPND distributions. Original payments and 437 successful later claims reconcile exactly to all 149 Polygon vesting records. Before the later upgrade, 107 addresses had outstanding tokens, including **38 original funding addresses owed 443,781.846196483910388258 XPND** under the recorded allocations. The other 42 original funding addresses had received their full allocations.

At **11:37:26 UTC**, outer sender 0x4d96f2d2143dd74a96d015a70953a5686fa6ed55 submitted a transaction to 3e0f containing a valid EIP-7702 delegation authorization. It replaced an existing delegation and transferred

ProxyAdmin ownership to 4d96. At **11:39:08**, 4d96 upgraded vesting proxy 0xcfb37488ee5ebbadf9b879c05d318beb7b85f6a5; at **11:40:16**, it withdrew **1,512,577.663750419638336396 XPND to itself**. This exactly equalled the contract balance and all recorded unclaimed tokens immediately before the upgrade. At **11:46:10**, it sold the entire received amount through a swap paying **325.142524926446493136 native POL gross** to the same address. Intermediate route assets are not additional proceeds.

Signature recovery independently confirms **3e0f's address-level authorization of the code delegation**. It does not identify a human or establish informed approval of the subsequent business actions. Ordinary vesting ownership had moved to f27f in September 2022, while the separate upgrade authority remained with 3e0f at the relevant historical observations. The distinction matters: handing over ordinary ownership did not itself revoke upgrade power.

This is documented removal and sale of backing for mature unclaimed allocations. Later replacement agreements, recovery, compensation, economic loss and human responsibility remain unresolved. Explorer phishing labels are third-party annotations, not identity findings. No evidence here attributes the event to Laura, and its 2025 date cannot explain a 2022 departure without a further evidentiary link. The BUSD held at d2b8 on BSC remains a separate asset and balance observation.

Primary transactions: [delegation / control](#); [upgrade](#); [withdrawal](#); [sale / payout](#). Full tables, raw records, scope limits and independent review are in the current project-withdrawal report and [timeraiders_delivery / timeraiders_review](#) evidence folders. The [EIP-7702 specification](#) supplies the signature rules.

Records needed: project identities and accepted terms; human custody and instructions; the August 35b/14cc sweep; issuer settlement and fees; the 30 additional GAMI allocations; SHF buyer elections; and the Polygon control change, recovery and compensation. Bank receipts are relevant where fiat settlement is claimed. Laura's tenure supplies timing, not her instructions, knowledge or receipt. **Sources:** M08-M09; M20-M21 human/fundraising; M22; R35/R128-R134; current evidence lanes [gami_delivery](#), [pooled35b](#), [project4_control](#) and [timeraiders_delivery](#), each with raw records and integrity manifest.

24 Exchange routes and connected onward wallets

The November sale route sent **5,174 BUSD** through an intermediary to **0x4727...7c95**. A provider-attributed **2025** statement associates FixedFloat; historical 2022 custody/order remains unconfirmed. Private route swept **18m GMI in four transfers** to MEXC-associated wallets. Related onward f4f8 sent **12 BNB** back to beneficiary, including **1 BNB 36 seconds** before largest claim.

Older inventory ended nonce 73; pinned nonce 214. Selected additions include **May 2023 BUSD approval /789-BUSD swap→782.5799104396268 USDT**, plus **August 2025** swap; they do not complete history or assign commingled assets to GamiFi. FixedFloat documentation identifies order/payout/refund fields, not an actual match. No Laura key, customer credit or bank receipt is established.

Records needed: dated MEXC custody/customer credits/fills/withdrawals, FixedFloat order/payout and project mandates/beneficiaries; match exact hashes, not current labels alone. **Sources:** M08-M09; M20-M21 human/blockchain; R36-R39.

Launchpool, Panama and Cayman corporate records

25 Contracting-company changes and missing ownership bridge

Earlier terms name **Launch Pool Limited / unspecified Virgin Islands law**. Separate UK **LAUNCH POOL LTD 12992979** has a100-share formation schedule: **Robertson 26, Ivison 26, Aldarmaki 26, Lindley-Smith 11, SCR Advisors 11**. These are historical UK shares, not offshore/current beneficial ownership. April 2024 terms name **Asociados Carajo Inc., Panama 155733022**. Migration FAQs cite regulatory issues/management changes without enforcement order or executed transfer.

Laura's Launchpool COO appointment is dated May 2021; she is absent from reviewed UK initial shares/officers/PSC. BVI **Launchpool Ltd 2054898** remains secondary candidate. Arquivo.pt **19 October 2021** terms display **13 January 2021** revision, before candidate February 2021 incorporation; **1 February 2022** capture displays **10 November 2021**. Neither gives a company number; printed date is not

authenticated publication/effective date. GamiFi is a distinct target: official screenshot **Gamifi Limited 2082070**, directory incorporation **12 November 2021** still secondary.

Records needed: certificates/historical ownership, SCR identification, intercompany/operator agreements, Laura mandates and executed asset/IP/customer/data/liability assignments or novations. No approval of the 2024 move is assigned to Laura. **Sources:** M10 S01-S09/S21-S23/S43-S45; M14; M21 corporate; R40-R43/R92-R93.

26 UK accounts and approval-date discrepancy

UK 12992979's 2021 accounts show **GBP 100 debtors, 19 cash, 19 creditors, 100 net assets**. 2022 dormant-audit-exemption accounts show **GBP 119 assets, 19 creditors, 100 net assets**, approval **2 August 2023**, naming **L Robertson**, whose recorded resignation is **18 April 2023**. Compulsory strike-off/dissolution: **27 February 2024**.

Laura is not a reviewed UK officer. These balances are not consolidated GamiFi/Launchpool finances or evidence fundraising vanished. **Records needed:** actual revenue-booking entity, UK ledger/exemption basis, board authority or mandate explaining approval, and group relationships. **Sources:** M10 S03-S08/S19-S20; R44-R46.

27 Linford subscribers and Carajo's 2025 authority

Carajo deed 769 /31 January 2023 names **Linford Corporate Services Inc., BVI 1943018**, and **Linford Management Services Inc., BVI 1943021**. Exact names/numbers match Gazette strike-off **1 November 2018**, published **11 December**; restoration/capacity in 2023 remains unproved. Each agrees to one share; authorized capital **USD 1,000 /1,000 registered USD 1 shares** is not issued/paid capital or fundraising.

Deed 10116 records **7 February 2025 meeting, 7 May notarization /9 May registration**, unanimous voting-share representation without named shareholders/holdings. Neither deed names Laura, Launchpool, wallet, bank account or business transfer. General banking powers are not completed transactions; subscribers/service providers are not automatically ultimate owners.

Records needed: dated BVI status/restoration, Carajo stock register/allotments/transfers, BO and agency records, minute-book attendance/proxies and authorizing shareholders. **Sources:** M10 S39-S45; deed 769 pp2-3,7-10; deed 10116 pp3-4; R47-R48.

28 Cayman business connection and banking limits

SEC-hosted issuer Form D **1 February 2018** describes Alphabit Digital Currency Fund, Cayman exempted company formed 2017; several directors recur in UK Launchpool's initial schedule. Techstars partnership and Laura's operational roles establish a professional network, not her ownership of a Cayman company/bank account, personal GamiFi receipt, laundering or tax evasion.

GLEIF identifies **Alphabit Fund I / former Alphabit Digital Currency Fund, WC-319009 /LEI 213800NZCHTWXWVPWO96**; database name update **25 September 2019**, not certified legal date. CIMA 2017/2021 joins names through **1449685 Fund I /1450105 Fund II**. LEI lapsed; entity field is not current good standing. [R94-R96]

Separate providers: **Yield App Limited, Seychelles 229095**, July 2024 insolvent winding-up, December 2025 strike-off, later scheduled March 2026 court proceeding; **Cavenwell UK 17062233**, incorporated **2 March 2026**, plus Neil Rankin/Alphabit biography. These are entity/custodian leads, not 2021-2022 GamiFi engagements. An original SeyLII page archived 16 October 2025 now confirms case metadata for **Cork & Anor v Corbett & Ors [2025] SCSC 126**, dated 25 July 2025, and identifies its source PDF; the judgment body remains missing and no holding is adopted. [R140] Recovered 2017 Alphabit memorandum names providers but is unexecuted and its government-copy provenance unconfirmed. Unrelated Dalma regulatory matters/Helbiz litigation are not GamiFi evidence; the actual Alphabit jurisdictional dismissal remains in M21.

Records needed: executed investment/management/provider engagements, historical ownership/mandates, account/wire/ledger evidence if banking is alleged. **Sources:** M10 S11-S18; M21 corporate; R49-R50/R94-R100.

Separately identified associated projects

29 MegaFans forecasts, offering clarity and actual refund

The deck prints **USD 15m revenue-13m costs =4m income**, rather than 2m; cash lines calculate **0m/17m/2m**, versus printed **17m/47m/50m**; missing model lines might explain balances. User targets conflict. Republic displays **USD 400,000** versus **USD 40,000 Reg D component**; Reg S scope unresolved. PPM explains California/BVI entities and founder control. Express priority clauses exist for timing differences; category/issuer drafting still needs reconciliation. **Republic reports withdrawal/refunds: exclude from completed raises**. Laura's self-reported adviser/seed investment is not forecast authorship or offering control. [R51-R52]

Separate Launchblock matched Sale: **five deposits 6,025 USDT =5,000 refunded 28 June 2024 +1,025 owner proceeds1 July**. Claimed counter **561.112862335267803167 USDT-equivalent** is neither cash refund nor MBUCKS quantity; remainder alone is not proven loss. Successful Sale claims are reconciled below; accepted allocations and off-contract outcomes remain open. [R101-R103; R139]

The verified Sale history now totals **eight claims / 4,007.949016680484308333 MBUCKS**. An existing owner withdrawal on **8 January 2025**, after the original claim deadline, removed the remaining **77,420.050983319515691667 MBUCKS**. The **81,428** initial token inventory reconciles exactly. This includes excess inventory and must not be labelled entirely unpaid buyer tokens. Two buyers fully claimed, one was fully refunded, one partly claimed and one had no claim/refund in this Sale; accepted terms and off-contract outcomes remain unresolved. No Laura controller is identified. [R139]

Historical 2022 tokenomics changes public price **USD 0.15→0.20**, both printing **7.75m TGE** against **8.5m components**. Spores **4,001,500×USD 0.14 =USD 560,210**, not printed **USD 259,910**; category basis unresolved. Staking uses APY/guaranteed-return headlines versus individual APR; **28 June 2024** archive dates three Ferrum pool links, not reserves/deposits/payouts. Privacy wrappers identify **Termly 6187b4c9-0481-4366-bd7c-a8a9ab284a67**, not policy body. Separate 2023 MegaNFT audit does not certify games/staking/data flows.

Records needed: approved model/deck, executed venue-specific terms/allocations/refunds, accepted expiry and off-contract outcomes, staking/buybacks, binaries/SDKs/policies and Laura-specific approvals/interest. **Sources:** M12 MF01-MF20/deck pp6,15,18; M15; M20-M21 secondary; R71-R72/R104-R106.

30 Kaskade: repeated capital and rewards

Liquity trace **18-22 April 2024: 66 swaps**, about **1,993,826 nominal units** from **30,500 USDC**, ending **29,902.00513 USDC** before gas. Wider rewards: **28 claims /11 addresses /23,561.836668 LUSD, 78.539456%** of announced 30,000-LUSD trader budget, not all campaign rewards. Company reports **USD 30,000 incentives /5,601 direct fees, 18.67% recovery /USD 24,399 difference**; separate **USD 20,000 LP support** is not company loss. The partner criticizes reward farming; repeat capital is not new investment or identified human ownership.

Laura's self-reported **CMO/founding-team November 2023-March 2024**, corroborated March8 interview, precedes April-May activity. Separate **18 March-7 April Redacted** may overlap month-only tenure, without complete swap tape or her instruction. Launch terms openly invited incentive/arbitrage activity. Dated Scroll launch supports MVP delivery; indexed eligibility rebuts blanket no-airdrop allegation. September guide's token-conversion claim differs from inspected discretionary/no-entitlement terms; historical accepted version remains needed. Domain-sale redirect is a continuity lead, not her act.

Retrospective multipliers **1.1× aboveUSD10,000 /1.2× aboveUSD50,000 /1.3× ceiling** omit final threshold. May/July bundles identify campaign/epoch/wallet/points/volume/claims/Merkle resources, but endpoint returned no missing scoring rows. March rebate promise remains relevant to net returns.

Records needed: accepted rules/scoring/claims, gas rebates, complete relevant trading, custody/capital agreements and retained mandate after March. **Sources:** M13/M15; M20-M21 secondary; R53-R55/R73-R74/R77/R107-R108.

Financial quantities and technical identities

There is no defensible combined fraud-loss total. Claims, sales, exchange sweeps, liquidity returns and forwarded receipts overlap. Historical marks are not bank receipts. M09 uses prior-block pool/oracle values and dated Bank of Canada conversion; M05 uses historical UTC daily closes. Exact integer units and methods remain in the ledgers.

Record	Quantity / value	Correct interpretation
NEM regional receipts	221,287.57 XEM; approx. CAD 52,553.72	Twelve receipts into a mixed-use signer. Historical marks, not a proven KID grant or personal income.
Broader NEM onward route	5,748,124 XEM; approx. CAD 784,624.39	Selected five-wallet gross route, including non-KID activity; no established personal beneficiary.

Record	Quantity / value	Correct interpretation
NEM node rewards	183,273 XEM across 460 issuer receipts	Prior trace with strengthened payout-account attribution; a distinct category, not a new SEA grant.
GamiFi private claims	120,000,000 GMI	All five claims reconciled. Claim-time marks USD 22,859.76 / CAD 30,902.87 are not cash.
Private direct sales	USD 10,226.39 / CAD 13,755.46	Gross received-cryptoasset value from 42 sale outputs, not profit or a bank deposit.
Launchpool shortage	14,000,000 GMI	Unchanged obligations minus removed backing; withdrawal-time mark USD 2,675.88 / CAD 3,616.99 is not a loss award.
Combined 44m sale	5,174.293394 BUSD	Actual gross sale output; marked USD 5,174.14 / CAD 6,993.89. Includes the 14m route above.
Project withdrawals	63,001.817377359365034843 BUSD	Seven payouts; original FOMO principal refunded in full, Time Raiders matching balance located; other commercial settlements/entitlements unresolved (entry 23).
Staking replenishments	46,020,000 GMI	Six May 2023 payments to two separate pools; not customer-by-customer settlement or a USD loss measure.
Larger staking pool after final listed top-up	15,531,357.317956608042669419 GMI short	Recorded-principal comparison at block 28,290,015; not every accrued reward or a fiat loss.
NEM reserve archive	125 Symbol destinations	Archived mapping totals, not current reserves or personal income.
MegaFans Launchblock payments	6,025 = 5,000 + 1,025 USDT	Verified deposits, refund and owner-wallet proceeds; separate venue from Republic.
Kaskade 66-swap path	30,500 → 29,902.00513 USDC	Approx. 1,993,826 nominal stablecoin units of repeated turnover; not fresh investment.
Kaskade reward trace	23,561.836668 LUSD	28 claims / 11 addresses = 78.539456% of announced 30,000-LUSD trader budget; not total campaign rewards.

Address register

BNB Smart Chain = chain ID 56. Full hashes remain in R30-R36, the added references and M08/M20/M21. These identifiers locate records; they do not identify human owners.

NEM corporate records remain distinct: **Singapore Foundation 201632737H**, **Trust 201632738Z**, and **The Symbol Syndicate, US EIN 88-0622815**, a Delaware corporation formed 2022, whose 2022 Form 990 was signed November 2025. None alone proves an asset transfer between them. [M21 NEM; R119]

Reviewed source documents

M02 - KIDLETCOIN_NEM_MASTER_INVESTIGATIVE_MEMORANDUM_2026-09-06.pdf

24 pages; consolidated KID/NEM master, observations through 5 September.

M03 - LAURA_KIDLET_NEM_EVIDENCE_AUDIT_2026-09-05.md

Technical/source audit with primary locators; source-level and deployment boundaries.

M04 - KIDLET_CURRICULUM_PROVENANCE_2026-09-05.md

Immutable upload and byte-identity review.

M05 - KIDLETCOIN_TRANSFER_VALUES_CAD_2026-09-05.md

Exact transfer rows and historical valuation method.

M06 - GAMIFI_MASTER_INVESTIGATIVE_MEMORANDUM_2026-09-06.pdf

21 pages; historical offer/version and deployment findings. Later M09 supersedes unresolved money-trace points.

M07 - GAMIFI_VALIDATED_REVIEW_2026-09-05.md

Validated company review; later M06/M09 supply stronger code, terms and settlement findings.

M08 - GAMIFI_RECORD_REQUEST_BRIEFS_2026-09-06.md

Updated, unsent transaction-specific record targets.

M09 - GAMIFI_ONCHAIN_MONEY_TRACE_2026-09-06.md

Latest reconciled private allocation, funded Launchpool book, control history and routes. Governs money-trace updates.

M10 - LAUNCHPOOL_OWNERSHIP_AND_LAURA_2026-09-06.md

Latest ownership/deed update, including S44-S45. Companion PDF:
LAUNCHPOOL_OWNERSHIP_AND_DEEDS_UPDATE_2026-09-06.pdf (16 pages).

M11 - LAURA_PUBLIC_BUSINESS_MAP_AND_OWNER_CHECK_2026-09-05.md

Dated roles, identity bridges and public statement leads.

M12 - MEGAFANS_VALIDATED_REVIEW_2026-09-05.md

Offering, forecast, product and correction register.

M13 - KASKADE_VALIDATED_REVIEW_2026-09-05.md

Campaign/company review; M15 expands on-chain scope.

M14 - GAMIFI_BVI_2082070_FREE_SOURCE_FINDINGS_2026-09-06.md

Official screenshot identifier versus secondary incorporation-date evidence.

M15 - DEEP_TRADING_REVIEW_2026-09-05.md

Expanded Kaskade swaps/rewards; MegaFans token-promotion checks. Later M06/M09 govern GMI deployment/money details.

M18 - TECHSTARS_CARDANO_VALIDATED_REVIEW_2026-09-05.md

Resolved budget/cohort concerns; verified delivery distinctions.

M19 - COMPANY_AUDIT_INDEX_2026-09-05.md

Precedence and corrections across six company reviews.

M20 - MISSING_EVIDENCE_RESEARCH_2026-09-06.md

First 54-item follow-up synthesis. Original lane notes: research/human.md, corporate.md, fundraising.md, blockchain.md, kidlet.md, nem.md and secondary.md. Its later superseded access limits are corrected by M21.

M21 - GLOBAL_ARCHIVE_RESEARCH_2026-09-06.md

Global/archive follow-up synthesis with the seven corresponding research_deep lane notes, source manifests, raw chain receipts/states, archive acquisition records and independent arithmetic checks. Companion archive: GLOBAL_ARCHIVE_EVIDENCE_2026-09-06.zip. Its 54-item register closes narrow subquestions without claiming all compound gaps resolved.

M22 - 63002_BUSD_DEEP_DIVE_2026-09-07.md

Verified seven-withdrawal report and 63002_BUSD_EVIDENCE_2026-09-07.zip: full original FOMO refunds, Time Raiders pinned balance, GAMI/SHF onward payments, historical implementations and ID4 receiver change. This governs entries 17/23 over older settlement gaps.

Receipt links provide navigation; the chain findings rely on saved RPC request/response records, successful receipts and explicit block states. Public-provider re-queries are independent calculation checks, not independent node-provider corroboration. Raw acquisition errors are recorded and never treated as empty transaction histories.

Record handling and excluded allegations

Seek the particular person's statement, instruction, decision or custody on its actual date; use the source-specific targets under each issue and M08 briefs. Requests concern mandates/account records, not passwords or private keys. Preserve native dates/headers and originals alongside any delivery copy; hashes identify bytes, not truth or authorship.

No conviction, regulatory fraud finding, child-abuse determination or verified Laura bank receipt is identified. Unsupported Gotbit connections, ^{unrelated similarly named companies}, invented academic credentials, a fraudulent-appointment inference from Laura losing the 2018 election, failed-total-allocation arithmetic for MegaFans and no-delivery Techstars claims remain excluded. Actual submissions, misuse/injury or illicit sale of child data were not recovered. The wallet source defect is not proof of deployed credential theft. Positive deliveries, refunds, corrected notices and restored smaller-pool principal remain part of the evidence.

Additional primary identifiers for printed review

These identifiers reproduce the targets of the cited links above; they add no separate evidentiary claim.
